

How to be Referred

Patients are referred to St Wilfrid's Hospice by one of their healthcare professionals commonly their GP, hospital consultant, community nurse or specialist nurse. The referral should be discussed with the patient by the person making the referral before the referral is sent to the hospice.

We do not take referrals directly from patients but encourage a patient to talk to their GP or hospital consultant should they like to be referred to the Hospice.

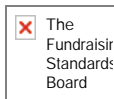

Patients are eligible to be referred to St Wilfrid's Hospice if they have a GP based in the surgeries from Emsworth to Arundel including Chichester and Bognor.

If a person is outside this catchment area they may be referred to one of the other hospices in Portsmouth, Worthing or Midhurst, see other local hospices for further information.
