

Patient Services

St. Wilfrid's Hospice provides a range of services to patients and families. We care for patients at home, in our [Day Hospice](#) and on our [Inpatient Unit](#), and offer support to families in a variety of ways. See our [Patient Guide](#).

Our multidisciplinary team of clinical and caring professionals are on hand to ensure the highest quality of care is delivered where it is needed.

Our [Inpatient unit](#) consists of 14 individual bedrooms with en-suite facilities and accommodates patients with a range of needs.

A team of nurse specialists provide [Community Care](#) to our patients at home and many of those patients make use of our [Day Hospice](#) facilities. Some patients are also supported at home by our [Hospice At Home](#) team. The [medical team](#) works closely with the whole multidisciplinary team to optimise the quality of patient care.

We continue to work with patients through our [Rehabilitation Service](#) and help them remain at home and achieve as much as possible. [Hospital Support](#) is provided by our [medical team](#).

Our [psychological and social care](#) team offer a range of support for families and carers. Patients and families are further supported through our [Complementary Therapies](#), [Spiritual Care](#), Support for carers, and [Bereavement Care](#).

Patients are referred to the hospice by a healthcare professional – see [How to be referred](#). If a person is not in the St Wilfrid's catchment population there are also hospices in Portsmouth and Worthing and a community team covering the Midhurst area – see [other local hospices](#) for further details.

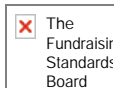

All of our services are supported by a fantastic team of people who include our housekeeping, catering, fundraising and administration staff. Our dedicated team works to the highest standard to ensure that all those who make use of our services encounter an excellent environment and facilities.
